IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re the Application of

Inventors: M. TAKEDA, et al. Art Unit: 3734

Application No.: 10/684,420 Examiner: K. Lee

Filed: October 15, 2003

For: VALVE UNIT AND FLUID CONTROL CHIP

RESPONSE TO RESTRICTION REQUIREMENT

Assistant Commissioner of Patents
Washington, DC 20231

Sir:

In response to the Restriction Requirement of August 10, 2004, Applicants hereby elect Group I, claims 1-18 and 23-44, with traverse.

Applicants respectfully request withdrawal of the Restriction Requirement. No unduly extensive or burdensome search would be required to examine the various claims of the noted Groups in the same application. MPEP §803 states:

"If the search and examination of an entire application can be made without serious burden, the Examiner *must* examine it on the merits even though it includes claims to distinct or independent inventions." (Emphasis added)

In the present case, the search for all pending claims together would not be burdensome.

Moreover, from the standpoint of costs to the Applicants involved in filing, issuance and maintenance fees relating to separate applications if the present Restriction Requirement is maintained, it is clear that there is substantially more burden on Applicants by imposing the present Requirement than on the Patent Office if the Requirement were withdrawn.

In addition, it is noted that to require the claims of the various Groups to issue in separate patents would result in inconvenience to the public by necessitating reference to more than one patent during searching, to review closely related subject matter.

Therefore, withdrawal of the Restriction Requirement is warranted.

Reconsideration and withdrawal of the Restriction Requirement are respectfully requested.

Respectfully submitted,

James E. Ledbetter
Registration No. 28,732

Date: November 18, 2005
